- INSTALLATION SERVICES OFFERED
- EXPERIENCED PROJECT SUPPORT TEAM
- READILY AVAILABLE COMPONENTS
- SUITABLE FOR ALL PIPE SIZES
- ONSHORE AND OFFSHORE PROJECTS
- ON TIME DELIVERIES
- LOW TRANSPORTATION COSTS
- DESIGN AND MATERIAL SUPPLY
- COMPETITIVE PRICING
- SMALLER EQUIPMENT AND CREWS OFFER A GREENER MORE ENVIRONMENTALLY FRIENDLY PIPELINE BUOYANCY SOLUTION

TerraTorque Inc.

TerraTorque is a manufacturing and construction company that provides quality products and professional services to the Oil and Gas Industry. We offer our customers high quality pipeline helical anchors and helical piling systems, as well as total project support and installation services.

Headquartered in Labuan, Malaysia our location means that the products and services your project depends on, especially in SE Asia, are readily available when you need them, on time and on budget.

flexible solutions for your project

THE TerraTorque ADVANTAGE

Ease of Installation

When compared to concrete systems, TerraTorque's helical anchors give you the advantage by reducing buoyancy control cost and improving constructability. The lightweight components mean easy handling in the field. Large equipment for handling concrete is eliminated.

Quality Products

Our products undergo rigorous inspection at every step of the manufacturing process. Our products are manufactured from high quality components and with strict adherence to all applicable codes and standards. Our quality control system, along with our ongoing third party testing program, means our customers— and their clients—can be assured the products we supply will meet or exceed their expectations.

Pipeline Helical Anchor Systems

Pipeline helical anchors are a well established technology, recognized as an economical and practical solution for pipeline buoyancy control. TerraTorque's helical anchor systems provide a cost effective and reliable method for controlling pipeline buoyancy.

TerraTorque products offer you all the benefits that a helical anchor system can provide. Our on time deliveries, competitive pricing and extensive experience make TerraTorque the smart choice for your project .

- **ENGINEERING AND DESIGN**
- **MANUFACTURING**
- **INSTALLATION SERVICES**
- **PROJECT SUPPORT**

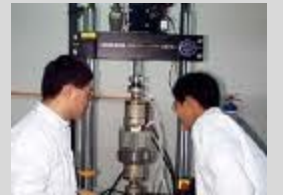

Project Support

Our quality products and on time deliveries are important for the success of your project. In addition to our manufacturing capabilities, TerraTorque can provide you with the professional support you need to make sure your project requirements are met.

Installation Services

Our experienced personnel coupled with the proper installation and testing equipment will ensure your specific job requirements are met. Whether you require technical support or complete turnkey installation services, TerraTorque has the products, personnel and equipment to get the job done.
